Power supply box

Part number: 2301A04002

Description

For the power supply of the DIAS infrared cameras PYROVIEW and PYROLINE in industrial application you can easily use the power supply box (IP65 protected). The quick-acting cover is equipped with a protective seal and can be opened easily.

This box contains a cap rail power supply with a wide input voltage range between 100 and 240 VAC and all necessary clamping units to attach the connection cable of the cameras. The power input fused. You can adjust the power output for large cable lengths to compensate the resulting fall of potential.

All incoming cables can be easily installed by a cable gland system and are thereby protected.
