

Handheld Bond Measurements

From the Low Resistance Experts. The only highly-portable, intrinsically safe bond meter assembled in the U.S.A. that offers superior accuracy, 100-hour battery life, and a 3-year warranty.

TRUST is an essential feature in any measurement tool and TEGAM’s new 700 Series bond meters are instruments you can **rely on every day** with confidence. These new models are designed with the clearest and most informative displays for mistake-free usage. They quickly produce accurate readings to reduce the time spent measuring.

TEGAM is the largest producer of bond meters for airframe testing in both military and commercial applications. We also make some of the finest low resistance measurements instruments in the world. We combined this experience into the smallest size bond meter that you can take with you anywhere on an airframe with ease. We also developed unique low power techniques so that you don’t have to deal with power cords or battery chargers. The 720A will run for 100 hours on 3 standard AA batteries and has auto power off to preserve them. The battery health is clearly indicated so that you have ample warning for replacement.

PROBES are often more important than the instrument. No one has wider range of configurations to meet and adapt to your needs. From tight spacing to piercing paint, we have a handle and tip combination for virtually all applications. You can mix styles to make your job easier. The dual connector system permits a Kelvin Clip on one lead for secure ground connection while the ergonomic tri-shape probe on the second lead can be used for accessing multiple points with one hand.

The creative ergonomic design makes these instruments easy to hold, easy to read and easy to clean. **Designed for one-handed operation**, these tools are comfortable to carry and use for extended periods of time.

Like all TEGAM products, the 700 Series bond meters are designed, assembled and tested in the United States. TEGAM backs this durable instrument with a **3-year warranty** to assure you that your investment is sound.

For over 30 years, TEGAM has been building hand held instruments for challenging applications. TEGAM’s 700 Series extends that experience into highly portable bond meters tasked with producing **reliable measurements in tight spaces encountered with aircraft**. They are designed to be durable and easy to use, with advanced features for better measurements.

When the Measurement Matters, Be Certain with TEGAM.

FEATURES

- Intrinsically Safe
- Superior Accuracy
±(0.2% |rdg| + 0.02% Range)
- Widest Probe Selection
- Uncomplicated, Back-lit Display
- 100-Hour Battery Life (3AA)*
- Smallest and Lightest Bond Meter
- 3-Year Warranty
- Assembled in USA

*Actual battery life depends on measurement range and frequency.
