XGARD **IQ**

Intelligent Gas Detector and Transmitter

XgardIQ offers powerful features which minimise the time operators spend in hazardous areas performing routine maintenance.

XgardIQ is an intelligent and versatile fixed detector and transmitter. Its remote sensor and universal transmitter means you have access to Crowcon's full range of sensor technologies and improved detection. With its sensor range selection capabilities it means users can set the full-scale range of the sensor according to specific location requirements.

Available fitted with a variety of sensors for fixed flammable, toxic, oxygen or H_2S gas detection, this SIL2 certified detector is easy and safe to use, with OLED display for easy visibility of reading even in dark locations and a +Ve safety indicator to quickly confirm the detector is operating soundly at a glance.

The XgardIQ is optionally available with Alarm and Fault relays and HART communications.

EASY TO USE

- Positive Safety indicator Status checking at a glance and from a distance.
- Bright, clear OLED display indicates gas level even in dark locations.
- Functions performed via buttons, without the need for special magnets or tools.
- Clear event log and history of detector use
- Ultra lightweight- just 85g for toxic versions

SIMPLE INSTALLATION & MAINTENANCE

Hot-swap sensor Modules
Easily removed or replaced using the tool provided without requiring hot work permit or special tools.

Auto-sense Function
Automatically detects whether the control system is 4-20Ma current sink or source, saving time and faults.

Auto-configure Function
Detects when sensor module is plugged in and uploads the appropriate gas type, range, units and alarm levels.

Smart Bump and Speedy Bump Test
Sensor health and response verified quickly and easily following simple on-screen instructions. Detector automatically provides a reminder when next bump test is due.

Calibration Due Warning
Automatically reminds the user when calibration is due to ensure sensors remain accurate at all times.

Sensor Range Selection
Users can set the full-scale range of the sensor via the display menu according to site or specific location requirements.
